Fun-gineering with Simple Machines

Using Lego® educational kits, budding engineers will learn about simple machines by building models of real-life devices such as a folding lawn chair, a car, drawbridge, or a conveyor belt. They will learn about the concepts of pulleys, levers, wheels, axles, and gears while bringing their projects to life with battery-operated motors. Through the building of realistic motorized models, students will develop an understanding of mechanical principles. They will explore, investigate, and solve problems in a fun group environment. Two children per Lego® kit.
